

March 25, 2011

The Board of Directors and Staff of St. Ann's Infant and Maternity Home thank the State of Maryland for providing a grant to renovate and improve the agency's physical plant with significant attention to the antiquated and inefficient HVAC system. This grant will allow us to continue to provide quality residential services to at risk, young children and pregnant and parenting teenage mothers.

We concur with the budget analysis and recommendation to approve the grant made by Ms. Angela Clark of the Maryland Department of Budget and Management.
