

Adding a second MultiFactor Authentication Factor to OneLogin

After successfully logging in, go to the profile

The screenshot shows the OneLogin user interface. At the top right, there is a user profile card for 'MARY' with a dropdown menu. The 'Profile' option in the dropdown is highlighted with a red box. Below the profile card is a search bar and navigation tabs for 'Frequents' and 'SPS: Everything'. A card for 'Production' with an 'SPS' logo is visible below the tabs.

Select Security Factors. Then click on Add Factor

The screenshot shows the 'Security Factors' page in OneLogin. On the left sidebar, the 'Security Factors' menu item is highlighted with a red box. In the main content area, the 'Add Factor' button is highlighted with a red box and a red arrow pointing to it. Below the button is a table of existing security factors.

Factor	Details	Last Used	Used For
Primary			
 OneLogin Protect	Samsung SM-G975U Android 10	22 minutes ago	 
 Email		2 months ago	

Choose which factor you want to add. Fill in the information requested.

To change your preferred (primary) authentication method

After you've added your authentication factors, you can determine which one you want to be your primary method.

Click on the 3 dots next to your preferred authentication factor. Click Set as primary.

Security Factors

Manage security factors to verify your identity when you sign in or reset your password.
