

# ARR Challenge FY21 Application and Demographic Data

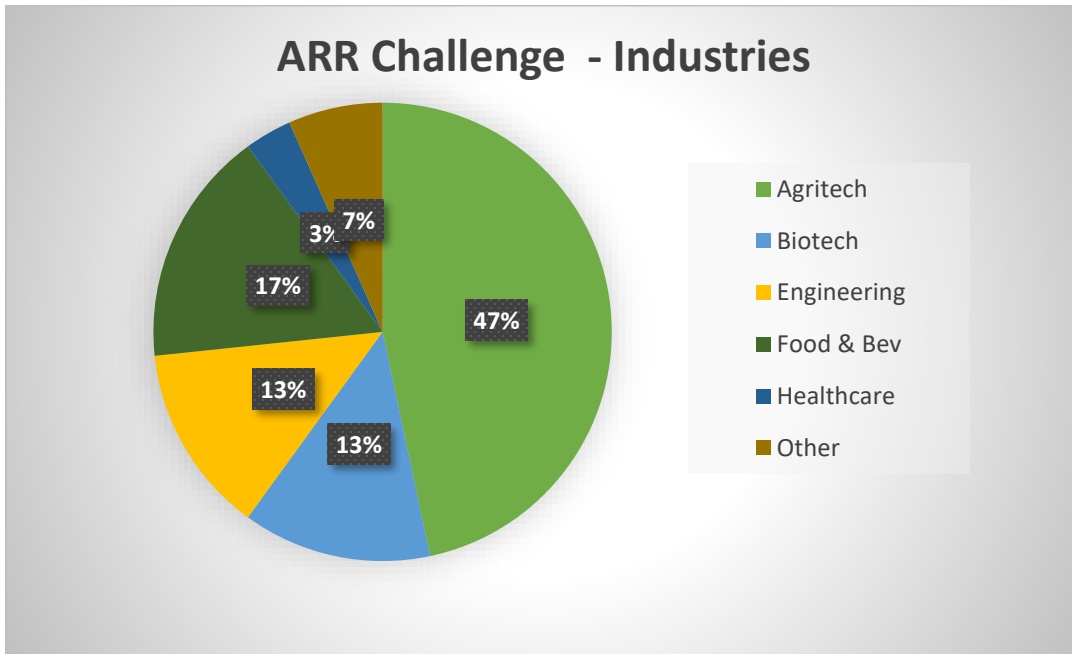

1. We received a 50:50 Rural : Urban primary applicant ratio with most for the rural applications coming from the Western and Upper Shore regions.

2. We received applications from all over MD.

3. One of the objectives of the ARR was to look for cross-disciplinary solutions to Agtech and other rural problems. We were there for excited to see a wide array of technology sectors represented.

4. We had a diverse representation of the applicants
