TCU Drug Screen II

Instruction Page

The following questions ask about your drug use (including alcohol) in the past 12 months. Please answer them by marking only one circle for each question. If you do not feel comfortable giving an answer to a particular question, you may skip it and move on to the next question.

If you are an inmate, please refer to the 12-month period immediately before you were locked up; that is, the last time you were in the “free world.”

Also, alcohol is a drug. Your answers to questions about drug use need to include alcohol use, such as drinking beer.

The example below shows how to mark the circles --

Scoring for the TCU Drug Screen II

Page 1 of the TCU Drug Screen is scored as follows:

1. Give 1-point to each “yes” response to 1-9 (Questions 4 and 6 are worth one point each if a respondent answers “yes” to any portion).
2. The total score can range from 0 to 9; score values of 3 or greater indicate relatively severe drug-related problems, and correspond approximately to DSM drug dependence diagnosis.
3. Responses to Question 10 indicate which drug (or drugs) the respondent feels is primarily responsible for his or her drug-related problems.

The TCU Drug Screen II was developed as part of NIJ Grant 1999-MU-MU-K008, *Assessment of a Drug Screening Instrument*.
