**Participants' Access to Providers**

The SLEOLA Plan would like to determine the availability of key EPO healthcare providers to its employee population. Prepare GeoAccess® GeoNetworks® report(s) for each network and/or plan type that you are proposing, using census data provided by the State and the parameters in the table below. Provide the reports using two separate formats: 1. using current EPO enrollment, and 2. using entire census population. Note that it is important that you follow the exact parameters. The report should show hospital and provider availability by physician specialty for each zip code (or community). Report output is required for those with access and those without access, based upon the stipulated parameters. The report output should show the average distance to each provider group. See the sections entitled "**FA2 Attachment S-5: Access to Adult PCPS,**" "**FA2 Attachment S-6: Access to Pediatricians,**" "**FA2 Attachment S-7: Access to OB/GYN,**" and "**FA2 Attachment S-8: Access to Hospitals**" for the required format of the output. In addition to the hard copy report, the data must be supplied in electronic format that has read/write capabilities. **Do not send the data in a read-only file.**

Use only physicians accepting new patients in your GeoAccess® GeoNetworks® provider file. The census data needed to perform this mapping is available for download upon execution of the Non-Disclosure Agreement (see RFP Section 1.37). Label the completed GeoAccess® GeoNetworks® report as **Response FA2 Attachment S-1: GeoAccess® GeoNetworks® Report.**

**FA2 Attachment S-12: Performance Guarantees**

**Representations made by the Offeror in this proposal become contractual obligations which must be met during the contract term.**

Offeror will report results on all performance measurements quarterly per the requirements of the Report Card and separately for each plan type. Performance results will also be audited annually by the State's contract auditor.

**NOTE:** It is critical to the success of the State's programs that services be maintained in accordance with the schedules agreed upon by the State. It is also critical to the success of the State's programs that the Contractor operates in an extremely reliable manner. It would be impracticable and extremely difficult to fix the actual damage sustained by the State in the event of delays or failures in claims administration, service, reporting, and attendance of Contractor personnel on scheduled work and provision of services to the citizens of the State. The State and the Contractor, therefore, presume in the event of certain delay(s) or failure(s), the amount of damage which will be sustained from the delay or failure will be the amount set forth below, and the Contractor agrees in the event of any such failure of performance, the Contractor shall pay such amount as liquidated damages and not as a penalty. The State, at its option for amount due the State as liquidated damages, may deduct such from any money payable to the Contractor or may bill the Contractor as a separate item.

**NOTE:** Items in the response column with the words **"Willing to Comply"** contain a drop down list of options including Yes or No. Select a response from those options as applicable. All "No" responses must be addressed in **"FA2 Attachment S-2: Explanations and Deviations."**
